

ANDREA CALDERON ZULUAGA

Solution Architect | Technical Team Lead | Cloud & Integration Architecture

Barcelona, Spain | (+34) 608 12 93 51 | andrea.calderon.zuluaga@gmail.com | LinkedIn: Andrea Calderon Zuluaga

PROFESSIONAL SUMMARY

Solution Architect and Technical Team Lead with experience designing enterprise software solutions, leading technical teams, modernizing Java applications, and delivering cloud and integration architectures. Skilled in Azure, MuleSoft, JDE, OutSystems, APIs, databases, legacy modernization, and enterprise system interoperability. Currently coordinating a multidisciplinary technical team of approximately 15 people, leading architecture decisions, technical estimations, delivery follow-up, mentoring, and stakeholder alignment. Strong ability to translate business needs into scalable, maintainable, and executable technical solutions.

CORE COMPETENCIES

Solution & Integration Architecture: Enterprise Architecture, System Design, Legacy Modernization, Application Modernization, Cloud Solution Design

Technical Leadership: Team Leadership, Technical Coordination, Mentoring, Technical Estimation, Delivery Follow-up, Risk Identification

Business & Delivery Alignment: Stakeholder Management, Requirements Analysis, Process Definition, Operational Efficiency, Business-Technology Alignment

Enterprise Systems: JDE, OutSystems, MuleSoft, APIs, Databases, Internal Business Applications

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL
Cloud & DevOps: Azure, GCP, AWS, Docker, Kubernetes, Jenkins, GitLab CI/CD

Backend & Integration: REST APIs, Web Services, MuleSoft, Node.js

Frontend: React, Angular, HTML, CSS, Webpack, Babel

Testing & Tools: Jest, Cypress, GitHub, GitLab, Bitbucket, Jenkins

EDUCATION

M.S. in Software Development and Architecture, La Salle Barcelona – URL | 2023 – 2024

Computer Science, University of Antioquia | 2017 – 2023

TRAINING & CERTIFICATIONS

DevOps Bootcamp: CI/CD, Jenkins, GitLab, Docker, Kubernetes | 2021

Additional Training: DevOps Essentials · Node.js · TypeScript · Google Cloud Fundamentals · Agentic AI and AI Agents

LANGUAGES

Spanish: Native
English: Professional Proficiency
Catalan: Basic

PROFESSIONAL EXPERIENCE

Solution Architect / Technical Team Lead

Europastry | Feb 2024 - Present

- Lead and coordinate a multidisciplinary technical team of approximately 15 people across architecture, development, support, delivery, and implementation activities.
- Define solution architecture for enterprise integrations involving JDE, OutSystems, Azure, MuleSoft, databases, APIs, and internal business applications.
- Drive technical decisions across cloud adoption, Java application modernization, system integration, deployment models, and enterprise platform evolution.
- Design and support scalable Azure-based solutions, ensuring maintainability, interoperability, security, and alignment with business requirements.
- Translate business, functional, and operational needs into feasible technical solutions in collaboration with stakeholders, developers, infrastructure teams, and business users.
- Lead technical estimations, impact analysis, prioritization, delivery follow-up, risk identification, and implementation planning.
- Provide technical guidance and mentoring to development teams, ensuring alignment with architecture principles, quality standards, and delivery objectives.
- Identify automation opportunities and define technical processes, documentation standards, and implementation guidelines to reduce manual effort and improve traceability.
- Create and maintain architecture documentation, integration designs, technical recommendations, and solution guidelines.
- Act as a bridge between business strategy, architecture, and delivery, ensuring solutions are technically sound and valuable for business operations.

Implementation Analyst / Frontend Engineer

YR | Nov 2022 - Feb 2024

- Coordinated a technical team of 3 to 5 people, supporting task planning, implementation follow-up, delivery alignment, and technical decision-making.
- Developed responsive web applications using React, JavaScript, TypeScript, and modern frontend development practices.
- Delivered customized digital experiences for 3D product personalization projects, improving product interaction, usability, and interface quality.
- Improved frontend architecture through reusable components, consistent user flows, interface standards, and maintainable code structures.
- Optimized web applications using Google Cloud Platform, Webpack, Babel, and frontend performance practices.
- Supported testing, deployment, and release activities using Jest, Cypress, GitHub, GitLab, and Bitbucket.
- Contributed to technical decisions related to frontend scalability, maintainability, tooling, development standards, and delivery practices.
- Built a strong hands-on software engineering foundation that now supports architecture decisions, solution design, and technical team leadership.

Developer

Aug 2020 - Sep 2021

- Developed and maintained web applications using WordPress, PHP, React, JavaScript, Docker, and MySQL.
- Created frontend views, styles, and components for web application projects, improving usability and interface consistency.
- Supported frontend, backend, and database development tasks across institutional digital solutions.
- Conducted user experience analysis to identify improvement opportunities and optimize user interaction flows.
- Collaborated with academic and administrative teams to deliver technical solutions aligned with user needs and institutional requirements.
- Supported digital communication initiatives, including web content updates and online newsletter activities.
